

Observação: Ordem d

The diagram shows a cross-section of a corrugated metal roof. The main profile has a height of 30 mm. The top flange has a width of 28 mm and a thickness of 27 mm. The bottom flange has a width of 20 mm and a thickness of 27 mm. The slope of the roof is indicated by a 41° angle. The distance between the centers of the corrugations is 29 mm. The drawing is labeled with '30' for the main height and '28' for the top flange width. The angle '41°' is shown at the base of the profile. The drawing is labeled with '20' for the bottom flange width and '27' for the bottom flange thickness. The distance between the centers of the corrugations is '29'.
